

Build on a name you can trust.

As a building professional, you're no doubt familiar with the American Standard Heating & Air Conditioning brand. You may even have installed our equipment in more than a few homes over the years.

But what you may not know is that we were one of the earliest pioneers in developing efficient and reliable home heating. Today, American Standard Heating & Air Conditioning is one of the largest and most trusted manufacturers of innovative home heating and cooling systems. These easy-to-install, quality units are perfect for your new construction and replacement projects, and they're engineered to meet government standards for durability and efficiency.

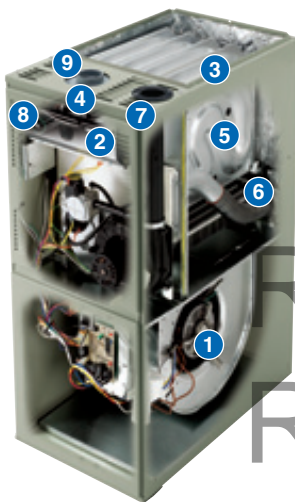

Rely on American Standard Heating & Air Conditioning for your cooling and heating needs, and you'll truly be building on a name you can trust.

American Standard Single-stage furnace

90

Engineered with quality components that work as hard as you do.

Up to
92.1
AFUE

1 Multispeed blower

Operates quietly and efficiently, gently warming and maintaining comfort. Also provides consistent air circulation during cooling.

2 Adaptive silicon carbide hot surface igniter

Starts burner electronically for safe, efficient operation – eliminating the need for a fuel-burning pilot light.

3 Heavy steel insulated cabinet

Holds more heat in the furnace. Also ensures greater durability and quieter operation.

4 Multi-port in-shot burners

Perfectly shape the flame cone to maximize heating while reducing fuel usage.

5 Aluminized steel heat exchanger

Crimped, not welded, to prevent cracks from heat stress. Stamped serpentine channel offers the greatest efficiency in less space.

6 AL29-4C™ stainless steel secondary heat exchanger

Captures more of the heat your customers pay for.

7 Induced draft venting

Quietly draws hot gases through the heat exchanger, maximizing the heat transfer efficiencies of the exchanger design.

8 Sealed combustion

For maximum safety, the burner combustion unit is sealed tight, also ensuring that it meets all local codes.

9 100% fresh air option

Uses 100% outdoor air for combustion, increasing equipment life and providing fresher air.

HEATING & AIR CONDITIONING

American Standard Single-stage furnace

It's all about choice.

When you give your homebuyers the opportunity to upgrade their home comfort system during the building process, you're helping them achieve their dream home—a home that's completely comfortable, every season of the year. And that's not all. By selecting a higher efficiency system, they could also use less energy for as long as they own their home. That means they'll have comfort and peace of mind from the moment they move in and for many years to come. Ask your independent American Standard Heating & Air Conditioning dealer for details.

A matched system delivers the highest comfort, efficiency and performance.

Each American Standard Heating & Air Conditioning component is designed and engineered to work seamlessly in what is called a "matched system." A balanced system, matched in SEER and size, is better than installing only one unit. It ensures the homeowner maximum efficiency and reliability.

Take comfort in our peace-of-mind warranties.

Your investment in an American Standard Freedom 90 gas furnace is well protected with limited warranties on the heat exchanger and functional parts.* Optional Extended Warranties are also available. Extended Warranties can pay for labor and other costs not covered by manufacturer's limited warranty. Ask your dealer for full warranty information at time of purchase. Warranties are for residential use only, some exclusions may apply.

*Registered Limited Warranty terms are available when you register within 60 days of installation. You can register online at americanstandardair.com or by phone at 800-554-8005, otherwise American Standard Heating & Air Conditioning's Base Limited Warranty terms will apply. Base Limited Warranty information on specific products can be found on americanstandardair.com.

American Standard Heating & Air Conditioning benefits for your customers

Reliable performance

Design innovations and rigorous testing ensure that our name goes on only the most reliable products.

Durable construction

Materials for all components are torture-tested for consistent, reliable, long-lasting performance and durability.

Enhanced comfort

Add American Standard Heating & Air Conditioning accessories such as Comfort Controls and Humidifiers to enhance overall performance and maximize comfort.

Cleaner air

Add an AccuClean™ air cleaner to remove up to 99.98% of airborne allergens from filtered air for a cleaner, more comfortable home.

Efficient operation

Increased efficiency may reduce customers' home heating and cooling energy consumption.

More than 100 years of feeling right at home.

When we made our first radiators in the 1880s, indoor heating was an innovation in and of itself. Since then, we've led the way in creating home comfort systems tailored to meet the needs that are most important to you. Whether your highest priority is comfort, efficiency, cleaner air or all of the above – we can help make your home the most comfortable place you've ever been.

American Standard Heating & Air Conditioning.

The name you know, the brand you trust.
